

Report: Successful Deployment and Piloting of FWC E-Registration App

The FWC E-Registration app was developed by Centangle Interactive for the Population Welfare Department to assist the family worker assistants and incharges in inputting client data directly from their centers. The project was funded by Forum for Safe Motherhood and was handed over to the PWD IT team after 7 months of development.

On Monday 30th January 2023, the technical lead of the development team handed over the source code and deployed the backend on the live server, providing training to the IT staff to allow them to make future changes. The following day, the representatives from Centangle Interactive provided a training session to the FWC staff, with two representatives from different FWCs of Peshawar in attendance.

The formal training session started at 10:30, where the orientation of the mobile app was given to the Director PWD and other members of the meeting. All staff members successfully added data to the app, which was reflected on the backend, and there were suggestions for improvement which will be incorporated.

The deployment was concluded with the arrival of the DG PWD who handed over tabs to the relevant staff members. The DG PWD thanked the FSM and HSA during her concluding remarks.

Overall, the deployment of the FWC E-Registration app was successful, with the staff successfully trained and able to use the app efficiently. The app will provide improved data input for the Population Welfare Department and streamline their processes.
